

**GRADUATE FELLOWS PROGRAM**

The AuSable Institute of Environmental Studies ([www.ausable.org](http://www.ausable.org)) is a Christian institute that cultivates a Christian environmental stewardship vision among students and faculty. The AuSable Graduate Fellows Program creates a graduate-level forum for discussion and exploration of a Christian worldview that takes seriously God’s creation of the natural world and humanity’s place and responsibilities in it.

The AuSable Graduate Fellows program identifies graduate students with exceptional abilities, interests, and leadership potential in environmental stewardship. Activities include:

- Monthly meetings for discussions on Christian faith and the environment;
- Fellowship with faculty, support staff, and graduate students who share a vision for creation care;
- Sponsorship of presentations and seminars by persons involved in environmental stewardship.

Although events and activities are open to all interested persons, the program also formally designates “Fellows” to the Institute. Graduate students in environment-related fields are invited to apply. Applicants should normally have two or more years remaining in their degree program. Designated Fellows are awarded:

- A stipend (\$200 per academic year) toward the purchase of books toward the development of their own stewardship library;
- Participation in a yearly program-wide conference with graduate students from other major universities.
